

# Let It Glow Floor Care System

## Six Month Maintenance

This floor has been on the **Let it Glow Floor Care System** for over 3.5 years. Floor is maintained 5 days per week using the Let it Glow Cleaner and Restorer diluted 1 oz. per gallon cold water in mop buckets and automatic scrubber. Every six months the **Let it Glow Floor Cleaner and Restorer** is mixed 4 oz. per gallon cold water and applied with a mop then scrubbed with a low speed side to side machine and a **Green Scrub Pad**. This process will remove any scuffs, black marks and any dirt that may have penetrated into the finish. The floor was then burnished with a propane burnisher and a **White Polish Pad**. Then one coat of **Let it Glow Floor Finish** was applied. This floor will look like this throughout the year.
