

# Let It Glow Floor Care System

## Eliminating Stripping

Stripping is a process used to remove old floor finish and ground in dirt. There are special preparations to be made depending on each facility, safety issues, extra labor needed, scheduling, equipment and supplies. By using the **Let it Glow Floor Care System** to maintain your floors, **you won't need to strip again!**

### What it means to eliminate stripping.

Let's use a 50,000 square foot building for example.

It will take \*4 hours to dust mop using a 36" dust mop.

It will take \*62.5 hours to strip using a 20" low speed side to side floor machine.

It will take \*18 hours to pick up dirty solution using a wet vac and 18" vac tool.

It will take \*19.5 hours to rinse using a 24 oz. mop and single compartment bucket.

It will take \*30 hours to apply 1 coat of finish x 5 coats = 150 hours.

Total Labor Hours = 254 @ \$15.00 per hour = \$3,810.00

It will take 36 concentrated gallons of stripper to strip the floor = 9 cases of gallons.

It will take 120 gallons of finish to apply 5 coats to a stripped floor = 30 cases of gallons

### Imagine the Savings!
